

# Zeke Naulty

## Software Engineer - MS Department of Finance

Senior .NET Software Engineer – Application Modernization, Database Engineering & Security  
(C#, .NET Core, VB.NET, SQL Server, IBM DB2)

## Summary

Senior .NET engineer focused on backend services, data flows, and modernization. Comfortable moving legacy workloads toward testable .NET Core/C# services, tightening telemetry, and improving reliability around schedulers, queues, and APIs.

Works close to the database layer (SQL Server, PostgreSQL, Oracle) and cares about shipping incremental improvements without breaking the business.

## Experience

### Software Engineer II - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Developed and maintained .NET Core services with Hangfire and Entity Framework over PostgreSQL and SQL Server to support complex insurance auto-protect workflows.
- Maintained existing WinForms and web applications, establishing unit-testing patterns and documenting deployment steps to improve stability and facilitate knowledge transfer.
- Collaborated with product to triage production issues in legacy code and refactor risky areas, aligning with application modernization goals.

Tech: C#, .NET Core, ASP.NET, WinForms, SQL Server, PostgreSQL, Entity Framework, Legacy modernization, Documentation, Knowledge transfer

### Lead Developer / Azure DevOps - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Led delivery of GLP-compliant lab software requiring dynamic user-defined data models and custom reporting, ensuring data integrity, traceability, and audit trails for application and database security.
- Designed and built ASP.NET WebForms/MVC/WebAPI services with RESTful OData and SOAP endpoints backed by Oracle using nHibernate, Entity Framework, and PL/SQL.
- Guided release engineering and Azure DevOps practices for builds, deployments, and database migrations, providing complex technical support for the platform.
- Mentored less experienced developers through code reviews and pairing, fostering improved quality and knowledge transfer.

Tech: C#, ASP.NET WebForms, ASP.NET MVC, ASP.NET WebAPI, Oracle, PL/SQL, Entity Framework, Azure DevOps, Application security, Database design and administration, Mentoring

### Programmer/Analyst - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 6 developers and 3 QA to modernize VB6 accounting and inventory systems into a single WinForms .NET application with role-based security, directly addressing application upgrade and enhancement.
- Analyzed legacy VB6 patterns and built transformation modules to automate conversion to VB.NET while preserving business logic, demonstrating development of improved applications and techniques.
- Built a new reporting frontend that supported legacy outputs while adding PDF generation, enhancing functionality through database and application changes.
- Ran Agile roadmaps and milestones, coordinating stakeholders and demos to deliver the modernization ahead of schedule, showcasing project management and problem-solving skills.

Tech: VB.NET, C#, WinForms, Legacy modernization, .NET Framework, Application security, Database design, Team leadership

### Senior Software Developer - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack projects for multiple clients, specializing in WinForms, ASP.NET, and SQL Server

application creation and implementation.

- Mentored junior and mid-level developers on coding standards, testing habits, and practical estimation, contributing to knowledge transfer.

- Planned and tracked sprints, risks, and milestones while keeping stakeholders aligned across simultaneous projects, demonstrating leadership and problem-solving.

Tech: C#, ASP.NET, WinForms, SQL Server, Mentoring, Project management, Documentation

### **Programmer/Analyst I - Hancock Bank**

Dec 2000 - Aug 2001 | Gulfport, MS

- Developed desktop applications that pulled from Access and IBM DB2/Argo Data sources for banking teams, demonstrating experience with multiple database technologies.

- Designed and implemented SQL Server applications to support internal web and desktop tools, including data-driven ASP pages with validation JavaScript, emphasizing database design and application creation.

- Implemented reporting and data-access front-ends to surface financial data accurately, contributing to application functionality enhancement.

Tech: IBM DB2, SQL Server, ASP, JavaScript, Database design, Application creation

### **Application Developer/Architect - Solid Earth Inc.**

Dec 2006 - Jan 2011 | Huntsville, AL

- Developed and maintained RETS client and server software on Oracle and C#, achieving protocol compliance and reliable data handling for complex real estate integrations.

- Built configurable ASP.NET MLS frontends where branding and business rules were driven by XML, demonstrating application design and creation expertise.

- Created a market analytics and statistics module surfacing deep MLS metrics for brokers and administrators, enhancing application functionality.

Tech: C#, ASP.NET, Oracle, Application design, Performance tuning

### **Programmer/Analyst - Not Rocket Science**

Jan 2005 - Oct 2005 | Covington, LA

- Delivered full-stack .NET and SQL Server development for Zen-Noh Grain, supporting inventory and operations workflows and making changes to enhance functionality.

- Designed database schemas and service endpoints to keep data consistent across web and mobile surfaces, demonstrating database design expertise.

- Built a C# mobile application for a Sheriff's department to capture and sync field data, showcasing application creation in multiple programming languages.

Tech: C#, ASP.NET, SQL Server, Database design, Mobile development

### **Design Consultant - Rainmaker Advertising & Design**

Mar 2001 - Oct 2002 | Biloxi, MS

- Built components and frontends in VB6, VB.NET, ASP Classic, and ASP.NET Web Forms with Access and SQL Server backends, demonstrating experience with multiple .NET and database technologies.

- Delivered reporting and data-entry tools tailored to client campaigns and internal operations, contributing to application creation and enhancements.

Tech: VB.NET, ASP.NET Web Forms, SQL Server, .NET Framework

## **Skills**

### **Core**

- C#
- .NET Core
- .NET Framework
- ASP.NET (VB.NET)
- VB.NET
- Structured Query Language (SQL)
- SQL Server
- Database design and administration
- Application security
- Windows Server

- IIS
- Documentation
- Knowledge transfer

### **Supporting**

- IBM DB2
- Oracle
- PostgreSQL
- Azure DevOps
- Entity Framework
- Legacy modernization
- Mentoring
- Problem-solving
- Leadership

### **Other**

- Agile Methodologies
- AngularJS
- Bootstrap
- Cloud Platforms
- Cloud computing (Azure)
- CSS
- Database Development
- Full-stack development
- Git
- iOS
- JavaScript
- JIRA
- Kanban
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Project management
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- Web development
- ASP.NET
- WinForms
- Hangfire
- Xamarin Forms
- OData/SOAP APIs
