

Zeke Naulty

.NET Developer / Database Administrator at NWMLS

.NET Developer / Database Administrator – Full Stack, C#, ASP.NET, SQL Server, T-SQL

Summary

Systems-first developer with a long arc in .NET and JavaScript, comfortable moving between desktop, web, and backend work to make long-lived products easier to change.

Focus areas include refactoring legacy code, tightening data flows, and shipping dependable features with clear UX and sensible engineering practices.

Experience

Lead .NET Developer / Database Administrator - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Led delivery of full-stack GLP-compliant lab software, leveraging ASP.NET WebForms/MVC/WebAPI with REST OData and SOAP APIs backed by Oracle using nHibernate, Entity Framework, and PL/SQL for robust database systems.
- Guided Azure DevOps practices for builds, deployments, and database migrations across environments, implementing change management processes and database source control.
- Performed requirements analysis, conducted code reviews, and mentored developers, ensuring robust application development and maintenance through agile methodologies.
- Implemented configurable reporting pipelines and designed dynamic user-defined data models, maintaining data integrity and audit trails in complex database applications.

Tech: C#, ASP.NET WebForms, ASP.NET MVC, ASP.NET WebAPI, REST, SOAP, Oracle, PL/SQL, Entity Framework, nHibernate, AngularJS, Bootstrap, CSS, WinForms, Xamarin Forms, Azure DevOps, Agile Methodologies, Database design, Code review, Requirements analysis, Deployment, System integrations

Application Developer / Architect (Real Estate MLS Domain) - Solid Earth Inc.

Dec 2006 - Jan 2011 | Huntsville, AL

- Developed and maintained highly performant RETS client/server software on Oracle and C#, achieving industry compliance multiple times, directly relevant to RESO IDX system integrations.
- Built configurable ASP.NET MLS frontends driven by XML, supporting custom branding and business rules for various real estate boards and website initiatives.
- Tuned RETS performance, protocol compliance, and data handling for reliable broker and MLS integrations, and investigated/troubleshooted complicated database applications and stability issues.
- Created a market analytics and statistics module, surfacing deep MLS metrics for brokers and administrators, ensuring database environments support application needs.
- Coordinated deployments and maintenance windows with MLS stakeholders to maintain high uptime and data freshness, adhering to software development life cycle best practices.

Tech: C#, ASP.NET, Oracle, RETS, XML configuration, Performance tuning, Analytics, Reporting, Troubleshooting, Database development, System integrations

Software Engineer II - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Built .NET Core services with Hangfire and Entity Framework over PostgreSQL and SQL Server, supporting insurance auto-protect workflows and refining existing backend systems and applications.
- Developed and maintained .NET WinForms and web applications, contributing to a full-stack environment and ensuring system stability for various application development needs.
- Established unit testing patterns for WinForms and service code, and collaborated on domain-driven design adoption for robust application development and software development life cycle best practices.
- Collaborated with product and support to triage production issues, troubleshoot legacy code, and refactor risky areas for improved stability and application performance.

Tech: C#, .NET Core, WinForms, ASP.NET, Entity Framework, Hangfire, PostgreSQL, SQL Server, Unit testing, Troubleshooting, Full-stack development

Senior Software Developer - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack projects for multiple clients, performing full-stack development across WinForms, ASP.NET, and SQL Server.
- Mentored junior and mid-level developers, conducted code reviews, and performed production readiness checks to ensure robust application delivery and adherence to development best practices.
- Planned and tracked sprints, risks, and milestones, contributing to iterative, agile development methodologies and effective project progress.

Tech: C#, ASP.NET, WinForms, SQL Server, Project management, Mentoring, Code review, Agile Methodologies

Programmer/Analyst - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 6 developers in modernizing legacy VB6 accounting and inventory systems into a single WinForms .NET application with role-based security, including SQL Server integration.
- Built a new reporting frontend supporting PDF generation and viewing, improving user-friendly applications and utilities.
- Ran Agile roadmaps and milestones, coordinating stakeholders and demos to deliver the modernization ahead of schedule, adhering to software development life cycle best practices.

Tech: C#, VB6, VB.NET, WinForms, Reporting, PDF generation, JIRA, Agile Methodologies, Team leadership, SQL Server

Programmer/Analyst - Not Rocket Science

Jan 2005 - Oct 2005 | Covington, LA

- Delivered full-stack .NET and SQL Server development for Zen-Noh Grain, supporting inventory and operations workflows.

- Designed database schemas and service endpoints, building new table structures and ensuring data consistency across web and mobile surfaces for system integrations.

Tech: C#, ASP.NET, SQL Server, Mobile development, Inventory/operations workflows, Database development

Programmer/Analyst I - Hancock Bank

Dec 2000 - Aug 2001 | Gulfport, MS

- Designed and implemented SQL Server applications to support internal web and desktop tools, focusing on data access and reporting, and developing database systems.

- Developed desktop applications and data-driven ASP pages with validation JavaScript, pulling from Access, DB2, and Argo Data sources.

- Implemented reporting and data-access front-ends to surface financial data accurately, contributing to robust user-friendly applications.

Tech: Access, DB2, ASP, JavaScript, SQL Server, Reporting, Database development

Web Developer/Consultant - PK Promotions

May 2004 - Jan 2005 | Biloxi, MS

- Built web-based commodity production management and product evolution tracking systems using ASP and SQL Server, tailored to business workflows and serving as core database applications.

- Created sales and marketing tools, working directly with clients to refine requirements analysis and deliver incremental improvements to applications and utilities.

Tech: ASP, SQL Server, Web development, Requirements gathering, Reporting, Database development

Design Consultant - Rainmaker Advertising & Design

Mar 2001 - Oct 2002 | Biloxi, MS

- Developed components and frontends in VB6, VB.NET, ASP Classic, and ASP.NET Web Forms with Access and SQL Server backends, supporting client campaigns and internal operations.

- Assisted in IT system design decisions, contributing to overall architecture and system integration strategies for diverse application development initiatives.

Tech: VB6, VB.NET, ASP Classic, ASP.NET Web Forms, Microsoft Access, SQL Server, Web development, Database development, System integrations

Skills

Core

- C#
- ASP.NET
- SQL Server
- T-SQL
- HTML
- CSS
- JavaScript
- JSON
- Full-stack development
- Database administration
- Agile Methodologies

Supporting

- .NET Core
- Entity Framework
- Azure DevOps
- Oracle
- WinForms
- Problem-solving
- Troubleshooting
- Performance tuning
- Requirements analysis
- Code reviews
- Database design
- Application security
- APIs
- RETS
- Load balancing
- App monitoring
- Disaster recovery planning

Other

- AngularJS
- Bootstrap
- Cloud Platforms
- Cloud computing (Azure)
- Database Development
- Git
- iOS
- JIRA
- Kanban
- Leadership
- Mentoring
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Project management
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- Web development
- PostgreSQL
- Hangfire
- Xamarin Forms
- OData/SOAP APIs

- Legacy modernization
