

Zeke Naulty

Sr. .NET Developer at Randstad Digital

Senior .NET Developer — C#, ASP.NET, SQL, Web Applications, Full Life Cycle Development

Summary

Fullstack .NET developer who owns the path from UI through APIs to data. Builds and maintains ASP.NET Web Forms/MVC/WebAPI services, styles responsive interfaces, and keeps data models coherent.

Habitually improves developer experience and testability so fullstack changes can ship without fear. Comfortable across C#, JavaScript/TypeScript, AngularJS, Bootstrap, SQL Server, and PostgreSQL.

Experience

Lead Developer - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Designed, coded, analyzed, tested, and documented ASP.NET WebForms/MVC/WebAPI services with RESTful OData and SOAP endpoints backed by Oracle using nHibernate, Entity Framework, and PL/SQL, adhering to full life cycle development techniques.
- Implemented configurable reporting pipelines to ensure data traceability and audit trails, reflecting strong SQL skills and best practices.
- Created responsive web interfaces with CSS3, Flexbox, Bootstrap, and AngularJS, and maintained WinForms clients and Xamarin Forms mobile applications.
- Led delivery of GLP-compliant lab software, guided release engineering and Azure DevOps practices, and mentored developers through code reviews and pairing.
- Interfaced with users and QA on GLP expectations, ensuring enhancements, maintenance, and problem resolution for existing applications met specifications.

Tech: C#, ASP.NET WebForms, ASP.NET MVC, ASP.NET WebAPI, REST, OData, SOAP, Oracle, PL/SQL, Entity Framework, nHibernate, AngularJS, Bootstrap, CSS, WinForms, Xamarin Forms, Azure DevOps, GLP compliance, Reporting, Full life cycle development, Unit testing, Technical documentation

Software Engineer II - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Designed, developed, and maintained .NET Core services with Hangfire and Entity Framework over PostgreSQL and SQL Server to drive insurance auto-protect workflows, demonstrating strong SQL skills.
- Developed and maintained .NET WinForms and web applications, designing and preparing web program coding for business applications.
- Established unit-testing patterns for WinForms and service code, conducting unit testing to ensure compliance to specifications.
- Clarified service boundaries and domain concepts, contributing to early domain-driven design adoption.
- Documented patterns and deployment steps, creating essential technical documents for team enablement.
- Collaborated with product and support to triage production issues and refactor risky areas for stability, addressing problem resolution for existing applications.

Tech: C#, .NET Core, WinForms, ASP.NET, Entity Framework, Hangfire, PostgreSQL, SQL Server, Unit testing, Domain-driven design, Web program coding

Senior Software Developer - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack projects for multiple clients, focusing on WinForms, ASP.NET, and SQL Server work, applying full life cycle development techniques.
- Planned and tracked sprints, risks, and milestones, preparing routine periodic project status reports and communicating with customers and stakeholders.
- Mentored junior and mid-level developers on coding standards, testing habits, and practical estimation.
- Conducted code reviews and production readiness checks to ensure predictable releases, contributing to robust software development.
- Acted as a hands-on contributor, designing, coding, and debugging features for backend and desktop

applications.

Tech: C#, ASP.NET, WinForms, SQL Server, Project management, Mentoring, Code review, Estimation, Full life cycle development

Programmer/Analyst - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 6 developers and 3 QA to modernize VB6 accounting and inventory systems into a single WinForms .NET application, redesigning and preparing program coding for business applications.
- Analyzed legacy VB6 patterns and built transformation modules to automate conversion to VB.NET, preserving business logic and analyzing automation requests.
- Consolidated 8+ standalone modules into one cohesive desktop experience with role-based security.
- Built a new reporting frontend that supported legacy dot-matrix outputs and added PDF generation and viewing, reflecting strong SQL skills for reporting.
- Ran Agile roadmaps and milestones, creating work plans and schedules, and coordinating stakeholders and demos to deliver the modernization ahead of schedule.
- Drove quality practices and regression coverage, preparing test data and conducting unit testing to ensure compliance for the VB6-to-.NET cutover.

Tech: C#, VB6, VB.NET, WinForms, Reporting, PDF generation, JIRA, Agile, Team leadership, Role-based security, Automation, Unit testing

Application Developer/Architect - Solid Earth Inc.

Dec 2006 - Jan 2011 | Huntsville, AL

- Developed and maintained RETS client and server software on Oracle and C#, tuning RETS performance, protocol compliance, and data handling, demonstrating strong SQL skills and best practices.
- Built configurable ASP.NET MLS frontends where branding and business rules were driven by XML, designing and preparing web program coding for specialized business applications.
- Created a market analytics and statistics module, developing and documenting computer software programs and systems.
- Coordinated deployments and maintenance windows with MLS stakeholders, interfacing with users and customers and preparing routine project status reports.
- Provided ongoing support and troubleshooting for MLS customers, addressing maintenance and problem resolution for existing applications.

Tech: C#, ASP.NET, Oracle, RETS, XML configuration, Performance tuning, Analytics, Reporting, Web program coding, Technical documentation

Programmer/Analyst - Not Rocket Science

Jan 2005 - Oct 2005 | Covington, LA

- Built a C# mobile application for a Sheriff's department to capture and sync field data, demonstrating full life cycle development techniques.
- Delivered full-stack .NET and SQL Server development for Zen-Noh Grain, supporting inventory and operations workflows with strong SQL skills.
- Created an ActionScript + ASP.NET tracking application for shipments and tug boats with a custom web backend, preparing web program coding for business applications.
- Designed database schemas and service endpoints, analyzing, testing, and documenting computer software programs and systems.
- Worked directly with clients to prioritize features and ship iterations quickly as a consultant, interfacing with users to gain understanding for enhancements and problem resolution.

Tech: C#, ASP.NET, ActionScript, SQL Server, Mobile development, Inventory/operations workflows, Client consulting, Full life cycle development

Web Developer/Consultant - PK Promotions

May 2004 - Jan 2005 | Biloxi, MS

- Built a web-based commodity production management system using ASP and SQL Server, demonstrating strong SQL skills for business applications.
- Implemented product evolution tracking and created sales and marketing tools to support campaigns, preparing web program coding.
- Delivered applications with database-backed forms while tailoring flows to a small team's processes, conducting full life cycle development.
- Worked closely with the owner to refine requirements and roll out incremental improvements, interfacing with

users to ensure understanding for enhancements and problem resolution.

Tech: ASP, SQL Server, Web development, Requirements gathering, Reporting, Full life cycle development

Skills

Core

- C#
- .NET
- ASP.NET
- SQL Server
- Web Development
- Unit testing
- Full-stack development
- Project management
- Software Development Life Cycle

Supporting

- .NET Core
- T-SQL
- Oracle
- Entity Framework
- Azure DevOps
- JavaScript
- AngularJS
- APIs
- Design Documentation
- Requirements Analysis
- Problem-solving

Other

- Agile Methodologies
- Bootstrap
- Cloud Platforms
- Cloud computing (Azure)
- CSS
- Database Development
- Git
- iOS
- JIRA
- Kanban
- Leadership
- Mentoring
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- Web development
- WinForms
- PostgreSQL
- Hangfire
- Xamarin Forms
- OData/SOAP APIs
- Legacy modernization
