

Zeke Naulty

Software Engineer (AI Platform) at Replika

Software Engineer (AI Platform) — LLM Orchestration, Python, & Scalable Backend Architectures

Summary

Systems-first developer with a long arc in .NET and JavaScript, comfortable moving between desktop, web, and backend work to make long-lived products easier to change.

Focus areas include refactoring legacy code, tightening data flows, and shipping dependable features with clear UX and sensible engineering practices.

Experience

Software Engineer II (Backend & Services) - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Architected and maintained .NET Core services using Hangfire and PostgreSQL to manage high-frequency background jobs and real-time data synchronization.
- Engineered background processing pipelines and APIs to maintain sub-second data consistency across global web and desktop products.
- Collaborated with product teams to triage high-traffic production issues and refactor bottlenecked legacy code for increased reliability.
- Established performance-driven unit testing patterns to ensure stability during the rapid expansion of service boundaries.

Tech: C#, .NET Core, WinForms, ASP.NET, Entity Framework, Hangfire, PostgreSQL, SQL Server, Unit testing, Domain-driven design

Lead Developer (Architecture & Scalability) - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Led the delivery of high-availability lab software platforms supporting complex, user-defined data models and high-throughput audit trails.
- Designed and implemented microservice-style WebAPI endpoints with RESTful OData, optimizing for data lineage and traceability in regulated environments.
- Directed release engineering and DevOps practices using Azure, ensuring reliable CI/CD and database migration across multiple environments.
- Mentored engineering teams through code reviews and collaborative architectural design to raise the bar for system performance.

Tech: C#, ASP.NET WebForms, ASP.NET MVC, ASP.NET WebAPI, REST, OData, SOAP, Oracle, PL/SQL, Entity Framework, nHibernate, AngularJS, Bootstrap, CSS, WinForms, Xamarin Forms, Azure DevOps, GLP compliance, Reporting

Software Architect (High-Performance Systems) - Solid Earth Inc.

Dec 2006 - Jan 2011 | Huntsville, AL

- Developed and tuned RETS client/server software, achieving recognition as one of the fastest and most compliant servers in the US real estate industry.
- Optimized protocol compliance and data handling to ensure reliable real-time broker and MLS integrations.
- Built a market analytics module to surface deep statistical metrics from high-volume datasets for brokers and administrators.

Tech: C#, ASP.NET, Oracle, RETS, XML configuration, Performance tuning, Analytics, Reporting

Senior Software Developer - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack projects for multiple clients, moving between WinForms, ASP.NET, and SQL Server work as engagements required.
- Mentored junior and mid-level developers on coding standards, testing habits, and practical estimation.
- Planned and tracked sprints, risks, and milestones while keeping stakeholders aligned across simultaneous projects.

- Conducted code reviews and production readiness checks to keep releases predictable for consulting clients.
 - Interviewed and recruited engineers, helping shape hiring rubrics and onboarding practices.
 - Acted as a hands-on contributor when teams needed extra capacity on backend or desktop features.
- Tech: C#, ASP.NET, WinForms, SQL Server, Project management, Mentoring, Code review, Estimation

Engineering Systems Developer - Litton Avondale Inc.

Feb 1999 - Dec 2000 | New Orleans, LA

- Wrote low-level 3D-to-2D code transformations for complex engineering drawing data, focusing on transformation efficiency and accuracy.
 - Built a custom IDE for scripting and automating transformations, allowing engineers to iterate on geometry requirements without manual code rewrites.
 - Managed the deployment of networked applications and created robust error logging/reporting databases to monitor transformation runs.
- Tech: 3D to 2D transformations, Scripting IDE, Error logging, Deployment, Engineering tooling

Skills

Core

- Python
- LLM Integration
- Backend Engineering
- Microservices
- Event-Driven Architecture
- SQL & NoSQL
- Docker & Kubernetes
- Scalability & Reliability

Supporting

- C#
- .NET Core
- Agentic Orchestration
- NLP
- Real-time Processing
- API Design
- Azure DevOps
- PostgreSQL
- System Design Patterns

Other

- Agile Methodologies
- AngularJS
- Bootstrap
- Cloud Platforms
- Cloud computing (Azure)
- CSS
- Database Development
- Full-stack development
- Git
- iOS
- JavaScript
- JIRA
- Kanban
- Leadership
- Mentoring
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Oracle
- Problem-solving

- Project management
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- Web development
- Entity Framework
- ASP.NET
- WinForms
- Hangfire
- Xamarin Forms
- OData/SOAP APIs
- Legacy modernization
