

Zeke Naulty

Software Engineer (AI Platform) at Replika

Software Engineer (AI Platform) - Backend Systems, LLM Integration, Scalable Services, Python

Summary

Systems-first developer with a long arc in .NET and JavaScript, comfortable moving between desktop, web, and backend work to make long-lived products easier to change.

Focus areas include refactoring legacy code, tightening data flows, and shipping dependable features with clear UX and sensible engineering practices.

Experience

Software Engineer II (Backend Services) - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Built and maintained .NET Core services with Hangfire, PostgreSQL, and SQL Server to support high-scale insurance auto-protect features.
- Added background jobs and APIs to keep coverage, eligibility, and billing data in sync across desktop and web products, ensuring data consistency and reliability.
- Clarified service boundaries and domain concepts, contributing to the team's adoption of domain-driven design for scalable systems.

Tech: C#, .NET Core, ASP.NET, Entity Framework, Hangfire, PostgreSQL, SQL Server, API Development, Backend Development

Lead Developer / Azure DevOps (Backend & Systems Design) - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Led delivery of GLP-compliant lab software with dynamic user-defined data models and custom reporting, ensuring traceability and audit trails for high-availability systems.
- Designed and built ASP.NET WebForms/MVC/WebAPI services with RESTful OData and SOAP APIs backed by Oracle, emphasizing scalable and reliable data exchange.
- Guided release engineering and Azure DevOps practices for builds, deployments, and database migrations across environments, ensuring continuous integration and delivery.
- Mentored developers through code reviews and pairing to raise quality and foster robust system and software design patterns.

Tech: C#, ASP.NET WebAPI, REST, OData, SOAP, Oracle, Azure DevOps, GLP compliance, Backend Development, API Development, System Design, CI/CD

Application Developer/Architect (Real-time Systems & Performance) - Solid Earth Inc.

Dec 2006 - Jan 2011 | Huntsville, AL

- Developed and maintained RETS client and server software on Oracle and C#, achieving high performance and compliance, recognized as one of the fastest servers in the continental US.
- Tuned RETS performance, protocol compliance, and data handling to keep broker and MLS integrations reliable, optimizing for sub-second latency and high availability.
- Built configurable ASP.NET MLS frontends and created a market analytics and statistics module, coordinating deployments for high uptime and data freshness.
- Evolved the platform's architecture, providing ongoing support and troubleshooting for MLS customers in a real-time data environment.

Tech: C#, ASP.NET, Oracle, RETS, Performance tuning, Analytics, System Design, Backend Development

Senior Software Developer (Backend & Technical Leadership) - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack backend projects for multiple clients, moving between WinForms, ASP.NET, and SQL Server work while ensuring project quality and adherence to best practices.
- Mentored junior and mid-level developers on coding standards, testing habits, and practical estimation, serving as a force multiplier for team productivity.
- Planned and tracked sprints, risks, and milestones, keeping stakeholders aligned across simultaneous projects

and driving execution with velocity and ownership.

Tech: C#, ASP.NET, SQL Server, Project management, Mentoring, Code review, Backend Development, Leadership, Problem-solving

Programmer/Analyst (System Modernization) - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 6 developers and 3 QA to modernize legacy VB6 accounting and inventory systems into a cohesive .NET application with role-based security.

- Analyzed legacy VB6 patterns and built transformation modules to automate conversion while preserving critical business logic.

- Implemented a custom bug reporting and ticketing system that auto-promoted tickets into JIRA via APIs, improving feedback loops and system reliability.

- Ran Agile roadmaps and milestones, coordinating stakeholders and demos to deliver the modernization ahead of schedule and establish robust solutions for future growth.

Tech: C#, VB.NET, WinForms, JIRA, Agile, Team leadership, Legacy modernization, API Development

Skills

Core

- Python
- C#
- .NET Core
- ASP.NET
- LLM Systems
- Backend Development
- API Development
- SQL Server
- PostgreSQL
- Azure DevOps
- Cloud Platforms
- System Design

Supporting

- Oracle
- Entity Framework
- Hangfire
- JavaScript
- Problem-solving
- Leadership
- Project management
- CI/CD
- Web development

Other

- Agile Methodologies
- AngularJS
- Bootstrap
- Cloud computing (Azure)
- CSS
- Database Development
- Full-stack development
- Git
- iOS
- JIRA
- Kanban
- Mentoring
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development

- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- WinForms
- Xamarin Forms
- OData/SOAP APIs
- Legacy modernization
