

Zeke Naulty

Software Engineer (AI Platform) at Replika

Software Engineer (AI Platform) – LLM Orchestration, Scalable Backend Systems (C#, Python, SQL, Cloud)

Summary

Systems-first developer with a long arc in .NET and JavaScript, comfortable moving between desktop, web, and backend work to make long-lived products easier to change.

Focus areas include refactoring legacy code, tightening data flows, and shipping dependable features with clear UX and sensible engineering practices.

Experience

Software Engineer II - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Developed and maintained .NET Core services with Hangfire, Entity Framework, PostgreSQL, and SQL Server to support complex auto-protect features, ensuring data synchronization and reliability.
- Built APIs and background jobs to keep critical coverage, eligibility, and billing data in sync across diverse applications, contributing to system scalability and high-availability.
- Clarified service boundaries and domain concepts, promoting domain-driven design adoption and improving maintainability and testability of backend systems.

Tech: C#, .NET Core, ASP.NET, Entity Framework, Hangfire, PostgreSQL, SQL Server, APIs, Backend Development, Scalability, System Design Patterns

Lead Developer / Azure DevOps - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Led the delivery of GLP-compliant lab software, designing and building ASP.NET WebForms/MVC/WebAPI services with RESTful OData and SOAP endpoints, ensuring scalability and reliability of applied AI services.
- Implemented configurable reporting pipelines and dynamic user-defined data models that preserved traceability and audit trails, supporting complex business logic at scale.
- Guided release engineering and Azure DevOps practices for CI/CD, builds, deployments, and database migrations across environments, optimizing operational efficiency on cloud platforms.

Tech: C#, ASP.NET MVC, ASP.NET WebAPI, REST, OData, SOAP, Oracle, nHibernate, Entity Framework, Azure DevOps, CI/CD, Backend Development, System Design Patterns, Cloud Platforms, API

Application Developer/Architect - Solid Earth Inc.

Dec 2006 - Jan 2011 | Huntsville, AL

- Developed and maintained high-performance RETS client and server software on Oracle and C#, achieving top compliance and praised for speed, demonstrating expertise in scalable backend systems and API integrations.
- Tuned RETS performance, protocol compliance, and data handling to ensure reliable broker and MLS integrations, addressing real-time data needs and optimizing for global growth.
- Built configurable ASP.NET MLS frontends driven by XML, allowing for flexible branding and business rules without code changes, enhancing system adaptability and scalability.

Tech: C#, ASP.NET, Oracle, RETS, Performance tuning, Backend Development, Scalability, System Design Patterns, API Integrations, High-Availability Systems

Senior Software Developer - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack projects for multiple clients, specializing in backend, ASP.NET, and SQL Server development, acting as a hands-on contributor and a force multiplier for the team.
- Mentored junior and mid-level developers on coding standards, testing habits, and practical estimation, identifying problems and proposing robust solutions.
- Planned and tracked sprints, risks, and milestones, ensuring effective project management and stakeholder alignment across simultaneous backend projects, executing with velocity and a sense of ownership.

Tech: C#, ASP.NET, SQL Server, Backend Development, Mentoring, Project Management, Problem-solving, System Design Patterns

Programmer/Analyst - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 6 developers and 3 QA to modernize legacy VB6 accounting and inventory systems into a cohesive .NET application with role-based security.
- Analyzed legacy patterns and built transformation modules to automate conversion, preserving business logic while modernizing core systems and ensuring their scalability and reliability.
- Ran Agile roadmaps and milestones, coordinating stakeholders to deliver the modernization roughly three months early, demonstrating strong ownership and execution velocity in software design.

Tech: C#, VB.NET, Legacy modernization, Team Leadership, Agile, System Design Patterns, Problem-solving

Programmer/Analyst - Not Rocket Science

Jan 2005 - Oct 2005 | Covington, LA

- Delivered full-stack .NET and SQL Server development for inventory and operations workflows, focusing on robust backend solutions and scalable data management.
- Created an ActionScript + ASP.NET tracking application for shipments and tug boats with a custom web backend, demonstrating diverse backend integration skills and API usage.
- Designed database schemas and service endpoints to maintain data consistency across web and mobile platforms, crucial for building scalable and reliable systems.

Tech: C#, ASP.NET, SQL Server, Backend Development, Database Development, API, System Design Patterns

Skills

Core

- C#
- .NET Core
- Python
- LLMs
- Backend Development
- API
- SQL Server
- PostgreSQL
- Oracle
- Cloud Platforms
- Azure DevOps
- System Design Patterns
- Scalability
- High-Availability Systems

Supporting

- JavaScript
- Entity Framework
- Hangfire
- Microservices
- Event-driven Architectures
- CI/CD
- Conversational AI
- Gaming
- Leadership
- Project management
- Problem-solving

Other

- Agile Methodologies
- AngularJS
- Bootstrap
- Cloud computing (Azure)

- CSS
- Database Development
- Full-stack development
- Git
- iOS
- JIRA
- Kanban
- Mentoring
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- Web development
- ASP.NET
- WinForms
- Xamarin Forms
- OData/SOAP APIs
- Legacy modernization
