

Zeke Naulty

Principal Software Engineer at Synergy Information Solutions

Principal Software Engineer — AI Product Architecture, RAG Workflows & Full-Stack Development

Summary

Systems-first developer with a long arc in .NET and JavaScript, comfortable moving between desktop, web, and backend work to make long-lived products easier to change.

Focus areas include refactoring legacy code, tightening data flows, and shipping dependable features with clear UX and sensible engineering practices.

Experience

Principal AI Researcher & Engineer - EvoDev

Dec 2023 - Mar 2026 | Fairhope, AL

- Architected and implemented the Pillars of the Domain of Domains (DoD), a formal runtime governance architecture for RAG systems addressing context drift and unverifiable memory.
- Built BookForge, a Python-based AI workflow engine featuring multi-provider LLM orchestration (OpenAI, Gemini) and a layered prompt governance pipeline for long-horizon content generation.
- Developed Cognition, a 19-project C# agent framework designed for deterministic execution, tool dispatching, and durable state management.
- Applied RAG architecture principles to production-style workflows, focusing on citation integrity and scope control for AI-enabled features.

Tech: Python, C#, RAG Workflows, AI Agent Frameworks, API Design, Vector Databases, Technical Architecture

Lead Developer & Systems Architect - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Owned the delivery of high-value product features across a complex stack of WebForms, MVC, WebAPI, and mobile surfaces.
- Designed and implemented user-defined data models and configurable reporting pipelines that allowed for customer-specific extensibility without code changes.
- Guided release engineering and technical standards for the development team, ensuring high-quality deployments in uptime-sensitive environments.
- Built responsive front-end interfaces using TypeScript patterns and modern CSS, ensuring performant user experiences across desktop and mobile.

Tech: AngularJS, TypeScript, C#, Oracle, API Design, Technical Leadership, GLP Compliance

Software Engineer II - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Developed and maintained .NET Core services with Hangfire and Entity Framework over PostgreSQL to drive automated insurance workflows.
- Identified and removed delivery bottlenecks by clarifying service boundaries and introducing domain-driven design patterns.
- Collaborated closely with product leadership to balance speed and quality while triaging production issues in complex systems.

Tech: C#, PostgreSQL, .NET Core, Workflow Automation, Entity Framework

Principal Developer (Modernization) - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 9 in the end-to-end modernization of critical business systems, delivering the project three months ahead of schedule through pragmatic Agile roadmaps.
- Architected a unified desktop platform that consolidated 8+ modules into a single, high-performance C#/.NET application.
- Established technical decision records and documentation patterns to ensure long-term platform sustainability and knowledge sharing.

Tech: C#, VB6, VB.NET, WinForms, Reporting, PDF generation, JIRA, Agile, Team leadership, Role-based security

Skills

Core

- C#
- Python
- PostgreSQL
- RAG Workflows
- API Design
- Technical Leadership
- AI Product Development
- Full-Stack Architecture

Supporting

- TypeScript
- Angular
- Go
- Vector Databases
- Docker
- Linux
- CI/CD
- Regulated Environments

Other

- Agile Methodologies
- AngularJS
- Azure DevOps
- Bootstrap
- Cloud Platforms
- Cloud computing (Azure)
- CSS
- Database Development
- Full-stack development
- Git
- iOS
- JavaScript
- JIRA
- Kanban
- Leadership
- Mentoring
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Oracle
- Problem-solving
- Project management
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- Web development
- .NET Core
- Entity Framework
- ASP.NET
- WinForms
- Hangfire
- Xamarin Forms
- OData/SOAP APIs
- Legacy modernization
