

Zeke Naulty

.NET Developer / Database Administrator at NWMLS

.NET Developer & Database Administrator — C#, SQL Server, T-SQL, ASP.NET, MLS Systems

Summary

Systems-first developer with a long arc in .NET and JavaScript, comfortable moving between desktop, web, and backend work to make long-lived products easier to change.

Focus areas include refactoring legacy code, tightening data flows, and shipping dependable features with clear UX and sensible engineering practices.

Experience

.NET Developer / Architect (MLS & RETS) - Solid Earth Inc.

Dec 2006 - Jan 2011 | Huntsville, AL

- Architected and maintained RETS client/server software on Oracle and C#, achieving high-speed protocol compliance for real estate integrations.
- Performed intensive performance tuning of databases, stored procedures, and data handling to ensure sub-second response times for broker integrations.
- Built configurable ASP.NET MLS frontends and statistics modules, surfacing deep market analytics and metrics for real estate administrators.
- Coordinated with MLS stakeholders to manage deployment windows and maintain high data freshness and system uptime.

Tech: C#, ASP.NET, SQL Server, Oracle, T-SQL, RETS, Performance tuning, Database Architecture

Lead Developer / Database Administrator (Azure DevOps) - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Led full-stack delivery of lab systems using ASP.NET WebForms/MVC/WebAPI and complex relational database designs in SQL Server and Oracle.
- Guided database migration strategies and Azure DevOps release engineering for production deployments across multiple environments.
- Developed and optimized stored procedures, views, and complex T-SQL/PL-SQL queries to handle user-defined data models and custom reporting.
- Implemented rigorous audit logging and data lineage features to maintain system integrity and security compliance.

Tech: C#, ASP.NET MVC, SQL Server, T-SQL, Azure DevOps, Database Migrations, Stored Procedures, Oracle

Software Engineer II - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Engineered .NET Core services and background jobs using Hangfire and Entity Framework over SQL Server and PostgreSQL.
- Automated data synchronization across desktop WinForms and web applications to maintain eligibility and billing integrity.
- Collaborated with cross-functional teams to triage production database issues and refactor high-risk areas for improved stability.
- Established unit-testing patterns for database-interacting code and documented deployment procedures for the engineering team.

Tech: C#, .NET Core, SQL Server, T-SQL, PostgreSQL, Entity Framework, Hangfire, Unit testing

Senior Software Developer - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack projects for multiple clients, moving between WinForms, ASP.NET, and SQL Server work as engagements required.
- Mentored junior and mid-level developers on coding standards, testing habits, and practical estimation.
- Planned and tracked sprints, risks, and milestones while keeping stakeholders aligned across simultaneous projects.

- Conducted code reviews and production readiness checks to keep releases predictable for consulting clients.
 - Interviewed and recruited engineers, helping shape hiring rubrics and onboarding practices.
 - Acted as a hands-on contributor when teams needed extra capacity on backend or desktop features.
- Tech: C#, ASP.NET, WinForms, SQL Server, Project management, Mentoring, Code review, Estimation

Programmer/Analyst - Not Rocket Science

Jan 2005 - Oct 2005 | Covington, LA

- Delivered full-stack .NET and SQL Server applications for inventory and operations workflows, including custom database schema design.
 - Created service endpoints and mobile C# applications to capture and sync field data with backend SQL Server systems.
 - Optimized web backend tracking applications for logistics shipments using ASP.NET and SQL Server.
- Tech: C#, ASP.NET, ActionScript, SQL Server, Mobile development, Inventory/operations workflows, Client consulting

Programmer/Analyst - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 6 developers and 3 QA to modernize VB6 accounting and inventory systems into a single WinForms .NET application with role-based security.
- Analyzed legacy VB6 patterns and built transformation modules to automate conversion to VB.NET while preserving business logic.
- Consolidated 8+ standalone modules (receivables, payables, inventory, equipment, etc.) into one cohesive desktop experience.
- Built a new reporting frontend that supported legacy dot-matrix outputs while adding PDF generation and viewing.
- Implemented a custom bug reporting and ticketing system so end users could file issues across DEV/UAT/PROD and auto-promote tickets into JIRA via APIs.
- Ran Agile roadmaps and milestones, coordinating stakeholders and demos to deliver the modernization roughly three months early.
- Drove quality practices and regression coverage so the VB6-to-.NET cutover could ship without breaking daily operations.

Tech: C#, VB6, VB.NET, WinForms, Reporting, PDF generation, JIRA, Agile, Team leadership, Role-based security

Skills

Core

- C#
- .NET Core
- SQL Server
- T-SQL
- ASP.NET
- Database Administration
- Stored Procedures
- Performance Tuning
- Full-stack development

Supporting

- RETS
- MLS
- Azure DevOps
- Entity Framework
- HTML/CSS
- JavaScript
- JSON
- Database Migrations
- Agile Methodologies

Other

- AngularJS

- Bootstrap
- Cloud Platforms
- Cloud computing (Azure)
- CSS
- Database Development
- Git
- iOS
- JIRA
- Kanban
- Leadership
- Mentoring
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Oracle
- Problem-solving
- Project management
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- Web development
- WinForms
- PostgreSQL
- Hangfire
- Xamarin Forms
- OData/SOAP APIs
- Legacy modernization
