

Zeke Naulty

Software Engineer (AI Platform) at Replika

Software Engineer (AI Platform) – Backend Systems, Scalability, LLM Integration (.NET, C#, SQL/PostgreSQL, Azure DevOps)

Summary

Systems-first developer with a long arc in .NET and JavaScript, comfortable moving between desktop, web, and backend work to make long-lived products easier to change.

Focus areas include refactoring legacy code, tightening data flows, and shipping dependable features with clear UX and sensible engineering practices.

Experience

Software Engineer II - Storable

Jan 2021 - Dec 2022 | Cary, North Carolina, United States

- Built and maintained scalable .NET Core services with Hangfire, PostgreSQL, and SQL Server to drive real-time insurance auto-protect workflows.
 - Developed and maintained web applications and APIs, ensuring data synchronization and high availability across desktop and web products.
 - Clarified service boundaries and contributed to domain-driven design adoption, improving system stability and maintainability for future growth.
- Tech: C#, .NET Core, ASP.NET, Entity Framework, Hangfire, PostgreSQL, SQL Server, APIs, Backend Development, Scalability

Lead Developer / Azure DevOps - iAdvantage Software, Inc.

Feb 2017 - Jan 2021 | Cary, NC

- Led delivery of GLP-compliant lab software, designing and building ASP.NET WebAPI services with RESTful OData and SOAP endpoints backed by Oracle for high-availability systems.
 - Implemented configurable reporting pipelines and user-defined data models that ensured traceability and audit trails, supporting complex data operations at scale.
 - Guided release engineering and Azure DevOps practices for builds and deployments, ensuring scalability and reliability of applied services.
- Tech: C#, ASP.NET WebAPI, REST, OData, SOAP, Oracle, PL/SQL, Entity Framework, nHibernate, Azure DevOps, Backend Development, Scalability, System Design Patterns

Application Developer / Architect - Solid Earth Inc.

Dec 2006 - Jan 2011 | Huntsville, AL

- Developed and maintained RETS client and server software on Oracle and C#, achieving high performance and protocol compliance for real-time data handling.
 - Tuned RETS performance, protocol compliance, and data handling to keep broker and MLS integrations reliable and support scalable data flows.
 - Built configurable ASP.NET MLS frontends with XML-driven branding and business rules, enabling diverse experiences without code changes and contributing to system design.
- Tech: C#, ASP.NET, Oracle, RETS, XML configuration, Performance tuning, Backend Development, System Design Patterns

Programmer/Analyst - Not Rocket Science

Jan 2005 - Oct 2005 | Covington, LA

- Delivered full-stack .NET and SQL Server development for inventory and operations workflows, focusing on backend data management and reliable service endpoints.
- Designed database schemas and service endpoints to maintain data consistency and support applications across web and mobile surfaces.
- Built a C# mobile application for a Sheriff's department to capture and sync field data, demonstrating experience with integrated systems.

Tech: C#, ASP.NET, SQL Server, Mobile development, Backend Development, Database Development, APIs

Senior Software Developer - Rural Sourcing, Inc.

Jul 2013 - Feb 2016 | Augusta, Georgia Area

- Delivered Microsoft-stack projects for multiple clients, moving between WinForms, ASP.NET, and SQL Server work as engagements required.
- Mentored junior and mid-level developers on coding standards, testing habits, and practical estimation.
- Planned and tracked sprints, risks, and milestones while keeping stakeholders aligned across simultaneous projects.
- Conducted code reviews and production readiness checks to keep releases predictable for consulting clients.
- Interviewed and recruited engineers, helping shape hiring rubrics and onboarding practices.
- Acted as a hands-on contributor when teams needed extra capacity on backend or desktop features.

Tech: C#, ASP.NET, WinForms, SQL Server, Project management, Mentoring, Code review, Estimation

Programmer/Analyst - Prestage Farms

Jan 2016 - Sep 2016 | Clinton, NC

- Led a team of 6 developers and 3 QA to modernize VB6 accounting and inventory systems into a single WinForms .NET application with role-based security.
- Analyzed legacy VB6 patterns and built transformation modules to automate conversion to VB.NET while preserving business logic.
- Consolidated 8+ standalone modules (receivables, payables, inventory, equipment, etc.) into one cohesive desktop experience.
- Built a new reporting frontend that supported legacy dot-matrix outputs while adding PDF generation and viewing.
- Implemented a custom bug reporting and ticketing system so end users could file issues across DEV/UAT/PROD and auto-promote tickets into JIRA via APIs.
- Ran Agile roadmaps and milestones, coordinating stakeholders and demos to deliver the modernization roughly three months early.
- Drove quality practices and regression coverage so the VB6-to-.NET cutover could ship without breaking daily operations.

Tech: C#, VB6, VB.NET, WinForms, Reporting, PDF generation, JIRA, Agile, Team leadership, Role-based security

Engineering Application Developer - Litton Avondale Inc.

Feb 1999 - Dec 2000 | New Orleans, LA

- Wrote 3D-to-2D code transformations for shipbuilding engineering drawings on the LPD-17 project.
- Managed deployment of networked applications used by engineering teams.
- Developed error reporting/logging databases and front-ends to monitor transformation runs.
- Built an IDE to script and automate the transforms so engineers could iterate without rewriting code.
- Collaborated with engineers to translate CAD/geometry requirements into reliable transformation routines.

Tech: 3D to 2D transformations, Scripting IDE, Error logging, Deployment, Engineering tooling

Skills

Core

- C#
- .NET Core
- ASP.NET
- SQL Server
- PostgreSQL
- Oracle
- Azure DevOps
- Cloud Platforms
- Backend Development
- Microservices
- APIs
- System Design Patterns
- Problem-solving
- LLM Integration

Supporting

- Python
- JavaScript
- Entity Framework
- Hangfire
- Web development
- Full-stack development
- Git
- Agile Methodologies
- Project management
- Mentoring
- Leadership
- Scalability

Other

- AngularJS
- Bootstrap
- Cloud computing (Azure)
- CSS
- Database Development
- iOS
- JIRA
- Kanban
- Microsoft Azure
- Microsoft SQL Server
- Mobile application development
- Regular Expressions
- Software development
- Team Building
- Team management
- Time management
- Unified Modeling Language (UML)
- Visual Basic .NET
- WinForms
- Xamarin Forms
- OData/SOAP APIs
- Legacy modernization
